Introduction

1.1 Problem Statement

Build a web application that processes user answers from a web url and gives grades based on contents submitted by them

1.2 Description

The data is stored in an excel sheet, we will save the file in CSV (comma-separated values) file format. A text file that has a specific format which allows data to be saved in a table structured format. To display the data in tabular format we will make use of php, when the user submits the answer from a web url, depending on the length of the response submitted by the user scores are provided. For the php code to run localhost is required like XAMPP software in which we can use apache server to display output of the code on the chrome in tabular format, after that we create another column for length of the string, after which a separate column is created for scoring based on the length of the string. We also calculate the minimum maximum and average length, if the length of string is between 1-100 then score will be one, if the length of string is between 101-200 then score will be two, if the length of string of string is between 201-300 then score will be three, if the length of string is between 301-400 then score will be four, if the length of string is between 401-500 then score will be five, if the length of string is between 501-600 then score will be six, if the score is between 601-700 then score will be seven, if the score is between 701-800 then score will be eight, if the score is between 801-900 then score will be nine, if the score is between 901 and above the score will be 10.

Methodology

2.1 Technology

- 1 PHP

- 2 Apache server

2.2 Tools

- 1 VS code

- 2 XAMMP

Results and Discussion

The CSV file

02-05-2023 10:25	saurabhsanghavi099@gmail.com	I am very collaborative and able to work under pressure.I like to helping people who are in tough situation. A blind man was trying to cross the road but due to traffic he was not able to cross the road,so i helped him and also helped him to reach his destination.
02-05-2023 10:53	kshitiqbhatarao215@gmail.com	1. Problem solving I am really good at problem solving. Last semester we had a group project along with my friends. We developed an Android application. Everything went well till the last stage but at the stage of deployment of that application we got stuck. We were not able to predict what was wrong. Till the day before submission of the project we were struggling with the problem. But I sat 6-7 hours in the night to figure out the problem and finally I succeeded to find the solution to that problem. And our application was successfully deployed. 2. Multitasking I am really good at multitasking. Last semester we had to complete 3-4 assignments in the due of 1 day. So I did multitasking by managing all my other work. I was also working on a project so it was really difficult to manage so many things at once but I was able to complete all the tasks before deadline. 3.Strong work ethic One of my strengths is my strong work ethic. When I commit to a deadline, I do whatever it takes to deliver. above both examples are more than enough for showing my this strength 4. Good communication skills I have good communication skills. I am a good listener as well. I can effectively communicate with my friends, teachers and family members. I can express ideas clearly, and resolve conflicts effectively. Many times I was able to resolve the conflict between my friends because of my good communication skills. 5. Time Management
02-05-2023 11:57	dipaklondhe6511@gmail.com	1 . I can create beautiful html and css web pages . 2 . creativity . 3 . cricket (specially catching) . 4 . problem solving . in dbms project I am stuck into web page in which I need to create link that will redirect to another page . I had solve it in 30 min ..
02-05-2023 12:05	ckjoshi251201@gmail.com	My greatest strength is that I am able to complete any task which I take in hand within the deadline . The task may require me to learn complex things that would take someone days to learn . For example for our seminar in 5 th semester, I studied about 4 different papers, being naive related to machine learning , I completed and studied entire machine learning I required for making the PPT and report and was the first one in our group to complete giving seminar and report .
02-05-2023 12:13	yashjadhav9341@gmail.com	I do any work on time, I am a good leader, I never give up, I believe in myself, I never complain or blame anyone for failure. I believe in my self that's why I wanna improve my skills and knowledge want to improve overall myself time by time, Cause I personally believe that being first rated version of myself is better than being a second rated version of anybody else..
02-05-2023 12:59	abhishekpatil0613@gmail.com	I am a Hardworking person and I never give up easily. I always strive to achieve my goals and objectives. I work diligently until I achieve what I want. This quality has helped me a lot in my professional and personal life. I have assigned a project in my internship and I am very dedicated to achieve my respective goal of the project. I am Creative and Innovative.
02-05-2023 13:28	abhigunje9388@gmail.com	1.I am very collaborative. I've always enjoyed working on teams and it is one of my strongest attributes.In our previous year pbl project we led a project that involved diverse stakeholders and focus groups which taught me about my ability to inspire others in stressful condition. 2.My positive attitude is definitely one of my strengths in our previous year pbl project.Our team leader got involved in other activity,So i had to take the responsibility.I wasn't prepared for that,But my positive attitude help me to take the responsibility. 3.Timely management.I have a good time management skill.Whatever things that had been assigned to me i had tried my best to the things 4.Good leadership skills.When it comes to leadership i had tried my best to bring coordination within the team.And give mine 100% to the team.
02-05-2023 13:39	pratiksonkuwar11@gmail.com	I can work under pressure and I've critical-thinking skills and I can manage time effectively. In last semester I was simultaneously working on project, preparing for exams, and was doing one Udemey course. I was able to complete the project and Udemey course and also did good in exams.
		Name:Shrikant Sanjeev Pawar As an student, it is important to understand what your strengths and weaknesses are. Below 3 are my some of strengths. 1) Work Ethic : I believe that my academic strength is my work ethic along with my time management skills. Being a good student and getting good grades requires a strong work ethic along with focus and perseverance. In college many students believe that if you just complete an assignment then that is enough. However, I know that that is not the case. I make sure that I do all the homework that is assigned to me, even extra. If I know that there is an important test I will go the extra mile to study even more by doing extra practice, so that I can do well. I believe that the reason I have good grades is because I know this and I do it every time I have an assignment due. Getting all of your work done on time is such an easy way to get good grades and is fundamental to being successful in college with doing extra curricular activities. I also know that in life after college, doing the bare minimum does not suffice in the workplace. You must go above and beyond if you want to be successful. I am a good ethic person. Whenever I take any task or project I always try to complete it.

2/8/2023 0:06:25	vinithingmire19@gmail.com	1.Decision making- most of my friends came to me to make a decisions for most of the critical situations. 2.Calmness & awareness - My family members told me about this.I stay calm at any situation and act accordingly. 3.Helpful- IfI am able to help then I never say no to the needy person.	[length]: 290	[score]: 3
2/8/2023 14:04:36	diwaternutuja01@gmail.com	STRENGTH: 1. I am an independent person. I choose to struggle and give my best effort through every task to prove myself that I can do it instead of seeking help from someone. A small example to share, I usually prefer to complete my college assignments on my own instead of copying from someone knowing he/she could help me. 2. I am Self-Motivated Whenever I feel low, I know how to get self- motivated. I usually prefer to read quotes, listen music, meditate, etc. A small example to share. Recently, I had my End-Sem exam and I was little worried about it, and to get positive vibe I used to listen music which always make energetic and have faith in myself which made me stay focused. 3. I am Hardworking This hardworking strength makes me as a dedicated worker and have a detailed plan for the whole to get the tasks accomplished. Here, is a small example to share, In the beginning of day I usually prefer to schedule a plan regarding what tasks to be completed by the end of the day.	[length]: 995	[score]: 9
2/9/2023 21:27:50	mkutlimbani2002@gmail.com	1. I am creative. I have creative ideas (definitely the reason is doing meditation and exercise which boost the ideas).I gave very creative ideas to my friend on writing different vlogs. 2. Everyday I analyze my mistakes before going to sleep. I make sure that I learn from my mistake and don't repeat it. And incase if my behavior has hurted someone then apologise for it. 3. Not getting paucic when problem arises . Whenever a problem arises I always try to keep my mind calm and try to find a solution for it.	[length]: 510	[score]: 6
2/10/2023 12:28:55	prathamajsingh016@gmail.com	1. I've got the ability to solve a mathematical or technical problem in the most beautiful way there that exist. I first generate a solution and then check the authenticity of the solution and then instead of solving the next question(technical/ mathematical) I first verify that whether the particular question can be solved by any other way which is more efficient than the previously incorporated method. If I find the same then I solve the question accordingly and make the PERFECT solution. 2. I am a very trustworthy person. At bad times I'm not the one to throw someone under the bus. 3. I have empathy towards the needy around me. Needy always doesn't always mean those who belong to humble background. Needy can be someone who demands mental support. I don't turn my back on them and provide them with all the support I can.	[length]: 837	[score]: 9
